 Portfolio

PROFILE

Cloud & DevOps Engineer with experience in setting up cloud infrastructures and operations. Experienced in configuring and running CI/CD pipeline, operating systems, and guaranteeing reliability in all environments. Knowledgeable in controlling access, optimizing costs, and improving workflows to ensure security, efficiency, and production readiness.

TECHNICAL SKILLS

- **Languages/Frameworks:** Python, FastAPI, ReactJS, Go, JavaScript, bash
- **Tools:** Linux, Jira, Jenkins, Docker, Kubernetes, ArgoCD, Terraform, Prometheus, Grafana
- **Cloud Platforms:** Azure(Certified), AWS, GCP
- **Practices:** Monitoring, Incident Management, Troubleshooting, Agile, FinOps

CERTIFICATIONS

- Microsoft Security, Compliance (SC-900)
- FinOps Certified Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)
- GitHub Foundation
- Cybersecurity Essentials (Google)
- Introduction to Linux (LFS101)
- Microsoft Learn Student Ambassador

PROJECTS

Gas Distribution System

GitHub 

Designed and built a multi-role gas distribution platform with web and mobile access, enabling consumer requests, outlet stock tracking, QR-based cylinder verification, real-time notifications, and end-to-end workflow automation across outlets and the head office.

DevOps Ecommerce Deployment

GitHub 

Technologies: Docker, Kubernetes, Actions, Argo CD, Terraform, AWS (EC2, S3, Route 53), Ingress

Delivered a reliable e-commerce platform by solving scalability challenges, ensuring high availability, automating infrastructure management, improving customer experience and business continuity.

Automated Parking System (IoT + ML + Web)

GitHub 

Technologies: FastAPI, ReactJS, Firebase, C++, OpenCV, ESP32, IR Sensors, SG90 Servo

Created an intelligent parking solution enabling real-time detection and automated control, reducing congestion, improving efficiency, and enhancing user satisfaction.

WORKING EXPERIENCE

Associate Cloud DevOps Engineer - QuickMan

Mar 2026 - Present

Managing cloud infrastructure and automation across Azure and cPanel, including user and access management with Microsoft Entra ID. Applying FinOps practices to optimize cloud costs. Maintained secure CI/CD pipelines, supported containerized applications, and improved system reliability while streamlining workflows and platform configurations.

Intern Cloud DevOps Engineer - QuickMan

Oct 2025 - Mar 2026

Contributed to automation and infrastructure management on Azure, applying FinOps practices to optimize cloud costs. Built and maintained CI/CD pipelines, containerized applications, and deployed workloads using Kubernetes and other cloud resources. Supported monitoring of application metrics to ensure reliability, performance, and operational efficiency.

Web Developer - ASRL General Trading UAE(Remote)

Aug 2024 - Aug 2025

Developed and maintained web applications using React, GitHub, Bootstrap, Azure, and cPanel. Automated deployments via GitHub Actions have improved the release process. Increase customer engagement, supporting full digitalisation of business workflows for smoother operations.

Digital Marketing Executive – Alpha Health Group

May 2021 – Jun 2022

Collaborated with the R&D and development teams to expand the Sri Lankan healthcare client base through targeted campaigns and data-driven strategies. Improved online visibility with SEO optimisations and contributed to WordPress development and content enhancements to strengthen digital presence and user engagement.

EDUCATION

BEng(Hons) Software Engineering – London Metropolitan University

Jan 2023 – Aug 2025

First Class Honours

Gained strong practical experience by developing multiple real-world applications such as a Gas Distribution System, Wedding Planner, and Photoshoot Booking Platform. Also conducted an academic research study on “Influence of Data-Driven Innovation on Startup Growth in Sri Lanka,” exploring how data-driven strategies accelerate startup success.

SOFT SKILLS

- Collaboration
- Adaptability & Agility
- Communication

- Leadership
- Continuous Learning
- Problem Solving
